a
MG I (105 location pairs)
r = 0.64
b
MG II (136 location pairs)
r = 0.57
c
MG III (231 location pairs)
r = 0.60
d
MG IV (91 location pairs)
r = 0.56
Phenotypic response distance
Genomic profile distance
e
Genomic profile distance
Envirotyping distance
Geographic distance
Envirotyping distance, given genomic profile distance
Genomic, profiles and responses from separate halves of the lines (5th to 95th percentile of 30 splits)
Partial correlation detectable with 80% power
Mantel correlation with phenotypic response distance
MG I
MG II
MG III
MG IV
